Conservatives 36, Liberals 36, NDP 19, Green 6 in latest Nanos federal tracking
Nanos Weekly Tracking, ending July 20, 2018
(released July 24, 2018 - 6 am Eastern)
Play with the data at the interactive Nanos portal at http://www.nanos.co/dataportal/ > ballot tracking > issue tracking > economic tracking > cut the data by region and demographic and see the trend lines

**Ballot** – The latest Nanos federal ballot tracking has the Conservatives at 35.9 per cent support, followed by the Liberals at 35.8 per cent, the NDP at 19.0 per cent, the BQ at 2.0 per cent and the Greens at 6.1 per cent.

**Accessible Voters** – Asked whether they would consider voting for each of the federal parties, 51.8 per cent of Canadians say they would consider voting Liberal while 50.1 per cent would consider voting Conservative. Four in ten (40.6%) would consider voting NDP while 24.5 per cent and 30.2 per cent of Canadians would consider voting for the BQ and Green parties respectively.

**Preferred Prime Minister** – Nanos tracking has Trudeau as the preferred choice as PM at 40.5 per cent of Canadians followed by Scheer (25.2%), Singh (6.3%) and May (5.9%). Twenty one per cent of Canadians were unsure whom they preferred.

**Qualities of a Good Political Leader** – Six in ten Canadians (57.7%) believe Trudeau has the qualities of a good political leader while 40.8 per cent believe Scheer has the qualities of a good political leader. More than one in three (34.8%) say Jagmeet Singh has the qualities of a good political leader, while 36.1 per cent believe the same about May. One in six (18.9%) said interim Bloc Quebecois leader Mario Beaulieu has the qualities of a good political leader (QC only).

**Nanos Party Power Index** – The Nanos Index which is a composite of a series of measures including ballot and leadership impressions has the Liberals with 57.6 points, the Conservatives 53.5 points, the NDP 42.2 points, the Greens 35.6 points and the BQ 25.8 points (QC only).

Visit the live Nanos data portal where you can dynamically chart ballot, preferred PM and Nanos Index numbers by region, gender and age. The methodology for the weekly tracking is posted here. PDFs of the polling reports are on the Nanos website.

A national dual-frame (land+cell) random telephone survey is conducted weekly by Nanos Research using live agents. The weekly tracking figures are based on a four-week rolling sample comprised of 1,000 interviews. To update the tracking a new week of 250 interviews is added and the oldest week dropped. The margin of error for a survey of 1,000 respondents is ±3.1 percentage points, 19 times out of 20.

Nanos Party Power Index

Nanos Weekly Tracking

Applying advanced machine learning algorithms
The Nanos Party Power Index Tracking for Canada is based on a composite of the following public opinion measures: the national ballot, which party individuals would consider voting for, the top two choices for Prime Minister, and whether each party leader has good leadership qualities.

Contact: Nik Nanos
Ottawa: (613) 234-4666 x 237
Washington DC: (202) 697-9924
nnanos@nanosresearch.com
Methodology

www.nanos.co
The Weekly Nanos Tracking is produced by the Nanos Research Corporation, headquartered in Canada, which operates in Canada and the United States. The data is based on a dual frame (land + cell-lines) random telephone interviews with 1,000 Canadians using a four week rolling average of 250 respondents each week, 18 years of age and over. The random sample of 1,000 respondents may be weighted by age and gender using the latest census information for Canada. The interviews are compiled into a four week rolling average of 1,000 interviews, where each week the oldest group of 250 interviews is dropped and a new group of 250 interviews is added.

A random telephone survey of 1,000 Canadians is accurate ±3.1 percentage points, plus or minus, 19 times out of 20.

Since voters are not actually able to make a choice between elections, it is interesting to think about party strength and support more broadly. The Nanos Party Power Index fills this need by incorporating more information than just current vote preference.

The Nanos Party Power Index is a weekly composite measurement of federal party brands based on four questions about the federal parties and their leadership. The questions include:
- a ballot question that captures the 1st and 2nd vote preferences;
- a measure of whether the respondent would consider voting for the party;
- the 1st and 2nd preferences for Prime Minister of the current federal leaders; and,
- whether the respondent believes each current leader has the quality to be a good leader.

The views of 1,000 respondents are compiled into a diffusion brand index for each party that goes from 0 to 100, where 0 means that the party has no brand strength and 100 means it has maximum brand strength. A score above 50 is an indication of brand strength for the party and its leader at this time. The important factors in this weekly tracking include the direction of the brand strength or weakness and also the brand strength of one federal party relative to another.
## Technical Note

About Nanos

Nanos is one of North America’s most trusted research and strategy organizations. Our team of professionals is regularly called upon by senior executives to deliver superior intelligence and market advantage whether it be helping to chart a path forward, managing a reputation or brand risk or understanding the trends that drive success. Services range from traditional telephone surveys, through to elite in-depth interviews, online research and focus groups. Nanos clients range from Fortune 500 companies through to leading advocacy groups interested in understanding and shaping the public landscape. Whether it is understanding your brand or reputation, customer needs and satisfaction, engaging employees or testing new ads or products, Nanos provides insight you can trust.
