

Coronavirus as a top national issue of concern on the rise

*Nanos Weekly Tracking, ending August 7, 2020
(released August 11, 2020)*

NANOS

*Ideas powered by
world-class data*

Nanos tracks unprompted issues of concern every week and is uniquely positioned to monitor the trajectory of opinion on Covid-19. This first was on the Nanos radar the week of January 24, 2020. To access full weekly national and regional tracking visit the Nanos subscriber data portal.

“There has been an upward trajectory in Coronavirus as a top unprompted issue of concern over the past four weeks of Nanos tracking.”

Nik Nanos

ISSUE TRACKING - CORONAVIRUS

1,000 random interviews recruited from an RDD land-and cell-line sample of Canadians age 18 years and over, ending August 7th, 2020. The data is based on a four week rolling average where each week the oldest group of 250 interviews is dropped and a new group of 250 is added. A random survey of 1,000 Canadians is accurate 3.1 percentage points, plus or minus, 19 times out of 20.

*Canada Weekly Index Tracking Scores
(Ending August 7, 2020, n=1,000)*

METHODOLOGY

METHODOLOGY

The Weekly Nanos Tracking is produced by the Nanos Research Corporation, headquartered in Canada, which operates in Canada and the United States. The data is based on random interviews with 1,000 Canadian consumers (recruited by RDD land- and cell-line sample), using a four-week rolling average of 250 respondents each week, 18 years of age and over. The random sample of 1,000 respondents may be weighted using the latest census information for Canada. The interviews are compiled into a four-week rolling average of 1,000 interviews where each week, the oldest group of 250 interviews is dropped and a new group of 250 interviews is added.

A random survey of 1,000 respondents in Canada is accurate 3.1 percentage points, plus or minus, 19 times out of 20. This report is based on the four waves of tracking ending August 7, 2020. Readers should note that due to the Covid-19 outbreak and ESOMAR standards between April 3 and August 7, 2020 Nanos used its probability online panel. Data collection returned to telephone as of the week of August 7, 2020.

Since voters are not actually able to make a choice between elections, it is interesting to think about party strength and support more broadly. The Nanos Party Power Index fills this need by incorporating more information than just current vote preference.

The Nanos Party Power Index is a weekly composite measurement of federal party brands based on four questions about the federal parties and their leadership. The questions include:

- a ballot question that captures the 1st and 2nd vote preferences;
- a measure of whether the respondent would consider voting for the party;
- the 1st and 2nd preferences for Prime Minister of the current federal leaders; and,
- whether the respondent believes each current leader has the quality to be a good leader.

The views of 1,000 respondents are compiled into a diffusion brand index for each party that goes from 0 to 100, where 0 means that the party has no brand strength and 100 means it has maximum brand strength. A score above 50 is an indication of brand strength for the party and its leader at this time. The important factors in this weekly tracking include the direction of the brand strength or weakness and also the brand strength of one federal party relative to another.

TECHNICAL NOTE

Element	Description	Element	Description
Organization who commissioned the research	Nanos Research	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure.
Final Sample Size	1,000 Randomly selected individuals, four week rolling average of 250 interviews a week. Starting August 7, 2020 online probability panel.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell line or internet could not participate.
Mode of Survey	Recruited by RDD dual frame (land- and cell-lines) telephone survey. Hybrid random telephone online survey starting from April 3, 2020 to August 7, 2020.	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Estimated Response Rate	Nine percent, consistent with industry norms.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six-digit postal code was used to validate geography.	Question Order	Question order in the preceding report was asked in the following order – unprompted issue of concern, party consideration, unprompted vote preferences, preferred Prime Minister and qualities of a good political leader.
Demographics (Other)	Age, gender, education, income	Question Content	This was module one of a weekly tracking survey.
Fieldwork/Validation	Live interviews with live supervision to validate work. Online probability effective August 7, 2020.	Question Wording	The wording of questions is as presented in the report with a randomization of the political leaders for the question involving leader qualities.
Number of Calls/	Maximum of five call backs.	Survey Company	Nanos Research
Time of Calls	Local time 5:00-9:00 pm, on weekends 12:00- 6:00 pm	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Field Dates	Four-week period August 7, 2020		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/		

MÉTHODOLOGIE

Le suivi hebdomadaire de Nanos est produit par Nanos Research Corporation. Les données sont fondées sur des entrevues aléatoires avec 1000 consommateurs canadiens (recrutés au téléphone à l'aide de l'échantillonnage à deux trames (terrestre et cellulaire) avec des agents en direct, utilisant une moyenne mobile de quatre semaines avec 250 répondants chaque semaine, âgés de 18 ans et plus. L'échantillon aléatoire de 1000 répondants peut être pondéré selon l'âge et le sexe en utilisant les dernières données du recensement pour le Canada. Les entrevues sont compilées en une moyenne mobile de 1000 entrevues sur quatre semaines, où chaque semaine, le groupe de 250 Canadiens le plus anciennement interrogé est abandonné et un nouveau groupe de 250 entrevues est ajouté.

Un sondage aléatoire auprès de 1000 Canadiens est exact à $\pm 3,1$ points de pourcentage, plus ou moins, 19 fois sur 20. Les données présentées dans ce rapport sont basées sur la période de suivi se terminant le 7 août 2020. Les lecteurs doivent noter qu'à cause de la pandémie Covid-19 et le normes ESOMAR, à partir du 3 avril 2020, Nanos a utilisé son panel probabiliste. Les entrevues ont été menées par téléphone à nouveau à partir de la semaine du 7 août.

Comme les électeurs ne sont pas en mesure de faire un choix entre les élections il est intéressant de penser à la force du parti et à son soutien à un niveau plus large. Le suivi fédéral de Nanos répond à ce besoin en incorporant plus d'informations sur les préférences politiques, au-delà de la préférence actuelle de vote.

Le suivi fédéral de Nanos est une mesure composite hebdomadaire des marques des partis fédéraux fondée sur quatre questions concernant les partis fédéraux et leur leadership. Les questions comprennent:

- une question de scrutin qui capture les préférences de premier et de second vote;
- une mesure permettant de savoir si le répondant envisagerait de voter pour un parti donné;
- la 1ère et 2ème préférence pour Premier ministre parmi les dirigeants fédéraux actuels; et,
- si le répondant croit que chaque leader actuel possède les qualités d'un bon leader.

Les opinions de 1000 répondants sont compilées dans un indice de marque de diffusion pour chaque parti qui va de 0 à 100, où 0 signifie que le parti n'a pas de force de marque et 100 signifie qu'il a la force de marque maximale. Un score supérieur à 50 est une indication de force de marque pour ce parti et son leadership en ce moment. Les facteurs importants dans ce suivi hebdomadaire incluent la direction de la force ou de la faiblesse de marque ainsi que la force de marque d'un parti fédéral par rapport à un autre.

NOTE TECHNIQUE

Élément	Description	Élément	Description
Organisation qui a commandé la recherche	Nanos Research	Pondération des données	Les résultats ont été pondérés selon l'âge et le sexe en utilisant les données du dernier recensement (2016) et l'échantillon est stratifié géographiquement pour être représentatif du Canada. Voir les tableaux pour la divulgation complète de la pondération.
Taille finale de l'échantillon	1,000 répondants choisis au hasard, moyenne mobile de quatre semaines avec 250 répondants chaque semaine. À partir du 7 août 2020, panel probabiliste en ligne.	Présélection	La présélection garantit que les répondants potentiels ne travaillaient pas dans le secteur des études de marché, dans le secteur de la publicité, dans les médias ou pour un parti politique avant l'administration de l'enquête pour assurer l'intégrité des données.
Marge d'erreur	±3,1 points de pourcentage, 19 fois sur 20.	Groupes démographiques exclus	Les personnes de moins de 18 ans; les individus sans accès à lignes de téléphone n'étaient pas admissibles pour participer.
Type d'enquête	Enquête téléphonique (lignes téléphoniques terrestres et cellulaires) par génération aléatoire de numéros de téléphone (GANT). Enquête hybride par téléphone et en ligne du 3 avril 2020 au 7 août 2020.	Stratification	Par âge et sexe en utilisant les données du dernier recensement (2016) et l'échantillon est stratifié géographiquement pour être représentatif du Canada. Les régions plus petites comme le Canada Atlantique furent suréchantillonées pour assurer un échantillon régional minimum.
Méthode d'échantillonnage	L'échantillon a été recruté par des lignes terrestres et cellulaires à travers le Canada par l'entremise de génération aléatoire de numéros de téléphone (GANT).	Taux de réponse estimé	Neuf pour cent, en conformité avec les normes de l'industrie.
Données démographiques (captées)	Canada Atlantique, Québec, Ontario, Prairies, Colombie-Britannique; hommes et femmes; 18 ans et plus. Le code postal à six chiffres fut utilisé pour valider l'endroit géographique.	Ordre des questions	Les questions de ce rapport ont été posées dans l'ordre suivant : enjeu, considération de vote, les préférences de vote spontanées, le Premier ministre préféré et les qualités d'un bon leader politique.
Données démographiques (autres)	Âge, sexe, éducation, revenu	Contenu des questions	Ceci fait partie d'une enquête de suivi hebdomadaire et est le premier module.
Travail sur le terrain/validation	Entrevues en direct administrées par des agents et sous supervision du travail. Enquête hybride par téléphone et en ligne du 3 avril 2020 au 7 août 2020.	Formulation des questions	La formulation des questions est telle que présentée dans le rapport, les leaders politiques ont été affichés de manière aléatoire pour la question impliquant les qualités d'un bon leader.
Nombre d'appels	Maximum de cinq rappels.	Compagnie de recherche	Nanos Research
Heure des appels	Heure locale 17h à 21h, fins de semaine 12h à 18h.	Contactez	Contactez Nanos Research pour de plus amples renseignements ou si vous avez des questions ou des préoccupations. http://www.nanos.co Téléphone :(613) 234-4666 x 237 Courriel : info@nanosresearch.com.
Dates du travail sur le terrain	Période de quatre semaines terminant le 7 août 2020.		
Langue de l'enquête	L'enquête a été menée en français et en anglais.		
Standards	Ce rapport dépasse les normes établies par CRIC, ESOMAR et AAPOR.
